DryMeshTM
Anti-moisture layer

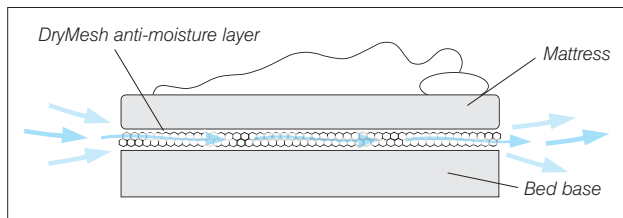

DryMesh™ anti-moisture layer for under mattress ventilation

95% air space to reduce moisture

3D mesh allows air to circulate freely under the mattress

DryMesh™ is a three dimensional woven polyester mesh, designed to reduce moisture under mattresses and cushions. Made from 100% non-absorbent white polyester, the unique 3D mesh allows air to freely circulate, eliminating condensation and mildew build up.

Both lightweight and flexible DryMesh can be easily cut to size and placed neatly under the mattress or cushion.

Applications

- Yachts, Motorboats and Super Yachts
- In the marine environment for both leisure and commercial craft
- Motorhomes, RV's, Caravans and Horseboxes
- Under mattress or cushions to reduce moisture build up
- Above water or fuel tanks or where condensation is caused
- Within mattresses and cushions to increase airflow and comfort

- Excellent anti moisture layer for ventilation under beds and mattresses
- Increased airflow in all directions
- Soft cushioning effect
- High shock absorption
- Long product life
- Highly durable
- Very light and tactile
- Washable
- Easy to fit
- Aesthetically pleasing

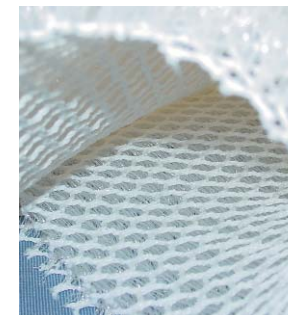

Fitting instructions

Supplied in boxes and to any length up to 35 metres/38 yards, DryMesh can simply be laid under the mattress and cut to shape with scissors.

By slightly over sizing, the mesh will remain in position following the contours of the berth.

Hatches or lockers can be accessed by cutting a flap out of the DryMesh on three sides. The product can be fitted in minutes.
